

# Meeting Feb 27 2024

Tuesday, February 27, 2024

1:30 PM

Underlying-meaning for embedding space of formulation factors

Emphasize Categorical

The value of the system

Use certain methods to achieve certain outcome that is valuable for what and that

To find an optimal formulation in less time, to understand the correlation in formulation space

Add multi-task

Impact of formulations, impact of tags

Introduce the tag variables in a concise way

We propose something to achieve something

Delete we propose(1) (2)

Existing visualization techniques, spotfire is not enough

Linear combinations of categorical variables can be learned through MLE

Parameterized tSNE

RNA

Reduce the burden of data acquisition
