

# Meeting discussion on project business justification

Friday, February 9, 2024 2:29 PM

## Meeting with Mike

To develop AI/ML models for drug development applications such as stability and solubility prediction, RNA (and protein) interaction, and sequential experimental design

Graph Neural Network, Gaussian Process (Bayesian), investigate factor interaction, dependency, long range

Two applications with stakeholder, RNA (DPS, Discovery Pharmaceutical science), DOE (BDB Biologics Developments and Biopharmtheutics)

## Meeting with Ti-chiun 1

To develop AI/ML models for drug development applications such as stability and solubility prediction, RNA (and protein) interaction, and sequential experimental design

Graph Neural Network, Gaussian Process (Bayesian), investigate factor interaction, dependency, long range

Two applications with stakeholder, RNA (DPS, Discovery Pharmaceutical science), DOE (BDB Biologics Developments and Biopharmtheutics)
